## Adding Your Signature to a Referral on the iPhone

Last modified on 06/12/2025 12:57 pm EDT

In the mobile EHR app on your iPhone, you can easily attach a signature to your referrals. Using a touchscreen mobile device provides you the unique ability to easily produce e-signatures that would be more difficult to produce on a computer.

2. After you reach your patient's referral page, select **Sign**. You can select sign at any time during the referral process before sending.

3. A window will open for you to sign. If you have a saved e-signature, it will appear. You can also simply just sign with your finger/stylus and save the signature for reuse. When complete, select **Save**.

Save

Clear
_

4. The referral will show as **Signed** and the signature will appear on the final version.
