

UB04 Boxes 39 - 41 - What is a value code and why is it needed on my institutional claim?

09/17/2024 1:50 pm EDT

Value codes are required on an institutional claim to identify data elements such as:

- Medicare lifetime reserve days, no-fault payments, and the number of days not covered by the primary payer.

They can be easily added to the UB04.

1. Navigate to **Billing > Live Claims Feed > Inside patient's encounter > right side of the screen > value code tab.**

The screenshot shows a software interface with a navigation bar at the top containing tabs: Info, Cond & Occ, Value Code, Insurance, and Attending. The 'Value Code' tab is selected. Below the navigation bar, there are three sections, each labeled 'Value Code' on the left and 'UB04 box 39', 'UB04 box 40', and 'UB04 box 41' on the right. Each section contains a vertical list of four items. Each item consists of a dropdown menu with a downward arrow and an 'Amount' input field. The first dropdown menu in the 'UB04 box 40' section is highlighted with a dashed border.

The codes entered here (up to 4 for each box) will appear on the UB04 in boxes 39-41.

	39 CODE	VALUE CODES AMOUNT	40 CODE	VALUE CODES AMOUNT	41 CODE	VALUE CODES AMOUNT
