

Adding Medications to the Patient Medication List on the iPhone

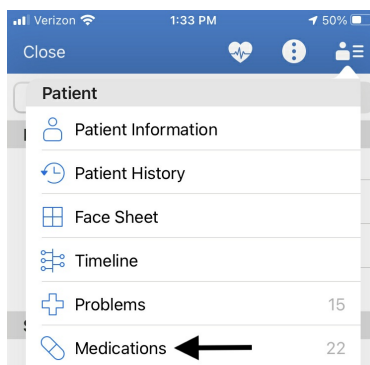

Last modified on 06/12/2025 12:55 pm EDT

You can quickly and easily add medications to a patient's chart on the iPad EHR. This article will guide you through the process.

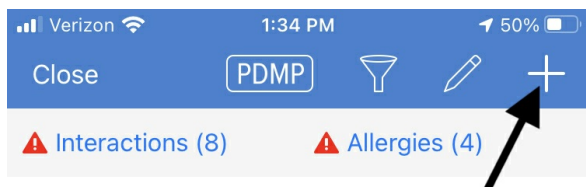

Medications can be accessed through a few places in the app, one way is to tap on the patient menu ().

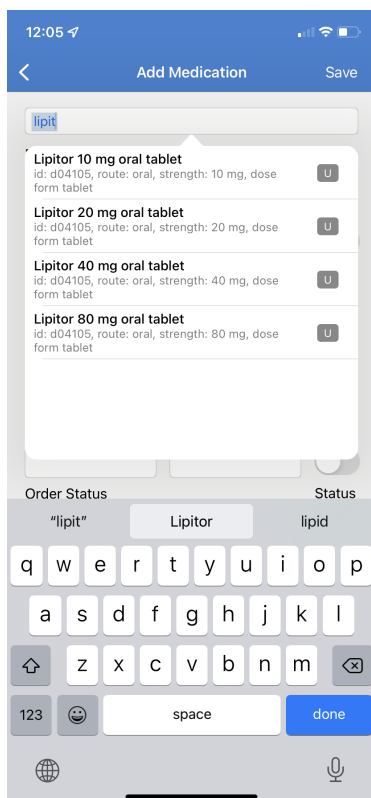

Select Medications.

Here you can view all the current medications in a patient's chart. Tap the () icon to add a new medication.

Enter the medication name in the search field. The results will display the medications by dosage from the Surescripts database. Tap on the medication to select it.

Enter the other details for the medication and tap **Save** to add the medication to the patient's medication history. Repeat as necessary for additional medications.
