

Recording a Manual Lab Order

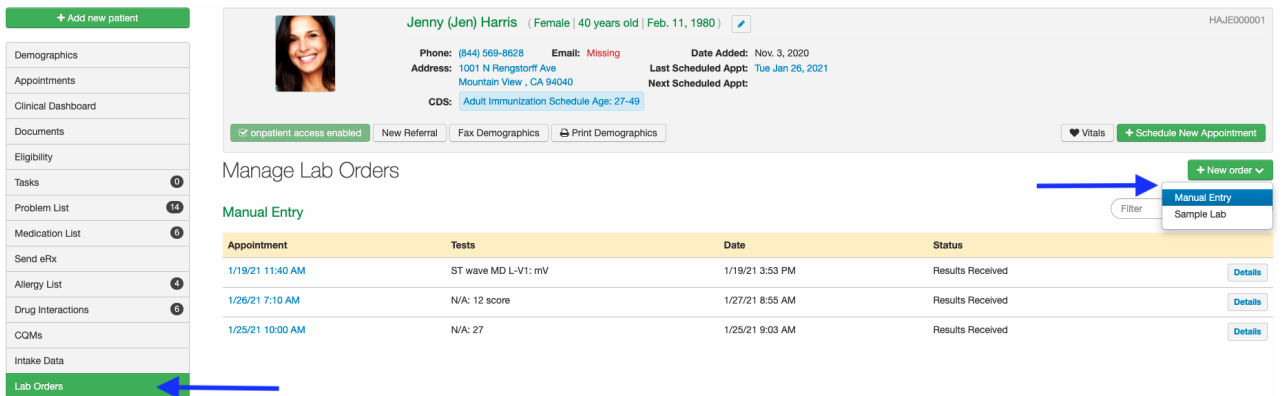

07/08/2024 7:59 pm EDT

You can manually enter lab orders in the patient's chart. To electronically submit lab orders, you need to be integrated with either Labcorp, Quest, or one of our lab partners. You can set up labs for your account [here](#).

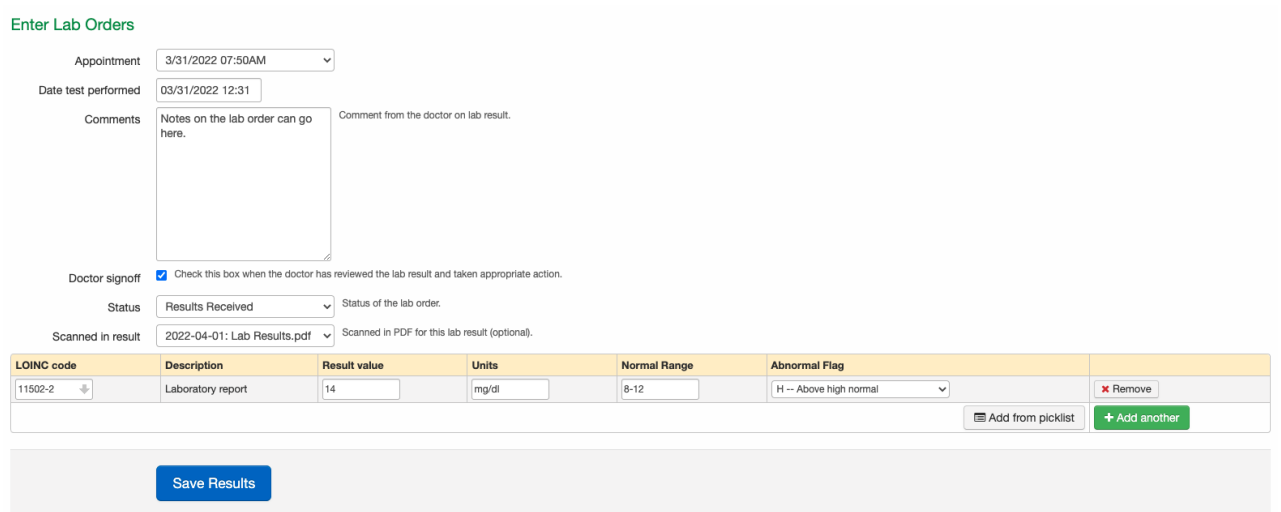

1. Go to Patient > Patient List and select or search for the patient.

2. In the patient chart click the Lab Orders button on the menu on the left and select Manual Entry.

3. Fill out the desired information for your lab and click Save Results.

4. Your lab order will appear at the top of the page. You can edit or delete your existing manual lab orders from this list. (Note: this only applies to manually entered lab orders. It does not apply to Quest or Labcorp orders).
