

# DrChrono Payments: Processing a payment from the patient demographics

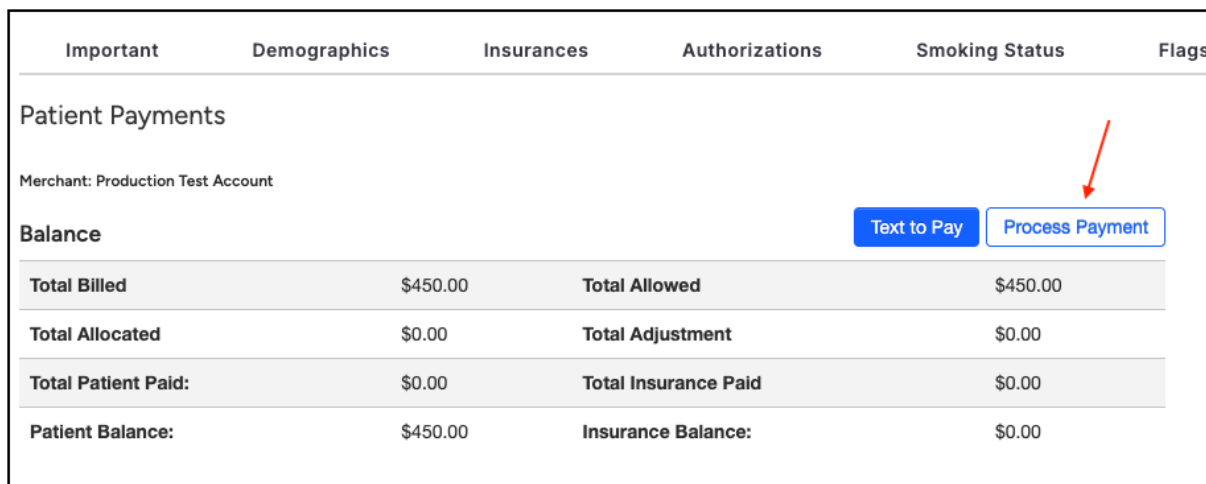

Last modified on 05/20/2025 1:51 pm EDT

DrChrono has added additional functionality to the DrChrono Payments tab under the patient demographic section. The section will now allow you to process patient payments via DrChrono Payments from the tab, as well as store credit card information without processing a payment.

1. While in a patient's chart, navigate to the **Demographics** section and select the **DrChrono Payments** tab.

2. Under the Balance header, press Process Payment.

3. In the pop-up box, a card can be swiped, manually entered, or selected from the dropdown under Card. Once the amount is to be charged, the appointment is selected, and any additional notes added, press **Process Payment**.

## Charge Credit Card

Merchant Account	<input type="text"/>
Card	<input type="text"/>
	No cards available <input type="text"/>
Amount	\$ <input type="text" value="0.00"/>
Appointment	<input type="text"/>
Additional Notes	<input type="text"/>

Swipe Card
