

How to use the free draw feature

Last modified on 01/12/2026 4:17 pm EST

With DrChrono, you can take advantage of the "free draw" feature we've built in the new template builder. Here, you can upload custom PDFs and pictures! Here's a list of medical photo and video resources that might be valuable in making *your* unique practice management system.

Before building your form, we recommend reviewing [Best Practices for Building Custom Forms](#) designed to help you make the most of the clinical notes feature.

Beginning in **February 2026**, we will start retiring the legacy Form Builder as part of the transition to Clinical Form Management. For more details and answers to common questions, please refer to our [FAQ](#) article.

Resources

Video files cannot be used in Freedraw fields in clinical notes.
