

# Release Notes for DrChrono Mobile Version 11.0.110

09/17/2024 5:18 pm EDT

## Updates

Summary	Description	Knowledge Base Article
Stripe SDK upgrade requirement	DrChrono has taken proactive steps to ensure that users will not be affected by Stripe's decision to discontinue support for necessary fixes on an older version of their SDK by the end of September 2024. Both the iOS and Android versions have been upgraded to maintain the functionality.	

## Resolutions

Description	Knowledge Base Article
Incorrect patient name rendering in the clinical note on the iPad	The system has been updated to ensure the clinical note is rendered for the correct patient.
Appointment duration field missing in the EHR app	A fix has been implemented to ensure the appointment duration appears in the appointment details section.
iPad portrait mode fix	We fixed an issue where the appointment list could not be toggled when the iPad was in portrait mode. The appointment list can now be toggled as expected.
App crash for video visits	The app has been updated to prevent crashes when ending a video visit.
