

# Set Up ConnectEHR for FHIR

Last modified on 12/05/2024 7:04 pm EST

To meet the [Provide Patients Electronic Access to Their Health Information](#) MIPS Promoting Interoperability measure, your practice must implement our [ONC Cures Edition Fast Healthcare Interoperability Resources \(FHIR\) API](#). To get started, you must set up ConnectEHR for FHIR.

Configure FHIR APIs before starting your Promoting Interoperability reporting period to earn the maximum points toward the [Provide Patients Electronic Access to Their Health Information](#) measure.

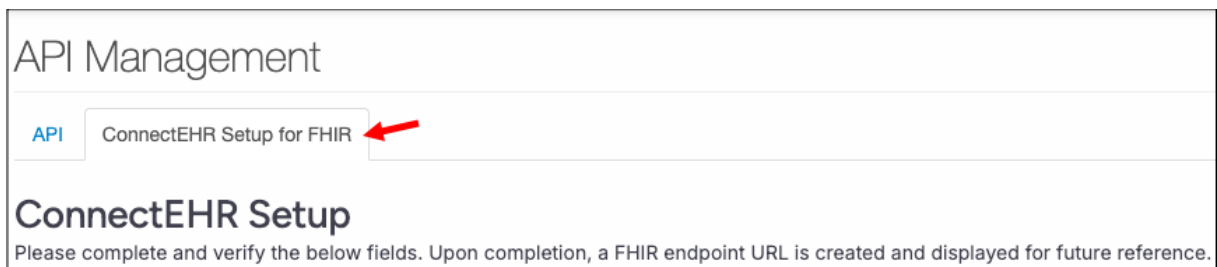

Fill out the [MIPS Dashboard for 2024 reporting form](#) completely. Not completing this entire process may impact your MIPS reporting.

You can use the ConnectEHR login credentials for third-party provider apps.

## Set up ConnectEHR

Practice admin users can access [API Management](#) and set up users for ConnectEHR.

1. Select **Account > API**.
2. Select the **ConnectEHR Setup for FHIR** tab.

The **Connect EHR Setup** page opens.

3. Fill out the form and then select **Connect**.

Practice Group 500588	
Practice Name Testside Primary Care	
Phone 555-555-1234	Fax (Optional)
Practice Email [Redacted]	Practice Email Domain me@mypractice.com's domain is mypractice
Street Address 1 123 Anywhere St	Street Address 2 (Optional)
City Anywhere	State/Province CA
ZIP/Postal Code 90000	Country United States
<b>Connect</b>	

**Status**

Not Connected

**FHIR Endpoint URL**

No URL

**Note:** Do not refresh your browser during this process. It may take several seconds (up to 20-30 in some cases) for the connected status to appear.

The status changes to **Connected** and a FHIR endpoint URL appears. If you are not connected, the status says **Not Connected**.

## Activate users for ConnectEHR

It is currently not necessary for individual users to activate ConnectEHR; however, the connection must be established at the practice level.

1. Under **User Management**, search for the user.
2. Select **Activate**.

## User Management

Please select users and activate in order for them to access ConnectEHR.

User Name	First Name	Last Name	Role	Status	Action
				Inactive	<a href="#">→ Activate</a>

1-1 of 1 item

- Under **Role**, **Clinician** is selected by default.
- Enter a password.
- Select **Activate**.
