Release Notes for DrChrono Web 2024-08-23

09/17/2024 11:04 pm EDT

What's new

Payments and RCM

Summary	Description	Knowledge Base Article
ePS enrollment requests	When requesting enrollments through the ePS portal, you will see TIN/NPI combinations with existing ePS enrollments. If you need to add a new combination, you can do that within the portal window.	ePS Request Submission Portal Updates
New Carisk Partners payer ID	New payer ID E4420, Risk Management Services Co. was added to the system. It can be added to a patient's chart and will be transmitted through Carisk Partners for processing.	
Ability to archive ePS enrollments	An archive button has been added to the ePS dashboard so you can remove any enrollments that are no longer needed or were submitted incorrectly.	eProvider Solutions: Can I archive a submitted request?

Practice Management

Summary	Description	Knowledge Base Article
Expose medication history consent to patient endpoint in API	Our API previously did not expose medication history consent, so clients had to update that field within the patient's demographics manually. Medication history consent is now an exposed endpoint in the API.	

Resolutions

Product Area	Summary	Description	Knowledge Base Article

Product Area	Summary	Description	Knowledge Base Article
Clinical and Regulatory	LabCorp results are creating new reqs when sent 60 days after the order	When a customer receives lab results from LabCorp more than 60 days after the original order was created, a new requisition is generated to link the results with the original order (requisition ID). A solution has been implemented to link the results with the original order (requisition ID) that the HL7 result file is sent with.	
Clinical and Regulatory	Clinical Form: Saving field error	We fixed an issue where an error appeared when you edited a smart field in the clinical note. Now when you edit a child smart field within the clinical note, the changes save successfully.	
Clinical and Regulatory	Medication (gabapentin) classification in Michigan	A solution has been put in place to ensure that the reclassified medication, gabapentin, is now correctly categorized as a non-controlled substance for Michigan.	
Clinical and Regulatory	Vaccine inventory lot (MVX code error)	When a user selects a vaccine from the vaccine inventory lot dropdown and there is a manufacturer code that auto-populates, the vaccine will be sent to Iron Bridge without issue.	
Practice Management	Updated **Account Settings**	We fixed an issue where you received an error when you opened the **Account Setting**s page from within the provider's account. Filtering has been adjusted to look specifically at the provider. You can now open the **Account Settings** page without receiving an error.	

Product Area	Summary	Description	Knowledge Base Article
Practice Management	**Inventory Management** page loads custom procedures	We fixed an issue where custom procedures did not load on the **Inventory Management** page. Custom procedures now load as expected.	
Practice Management	Updated ConnectEHR user roles	The clinician is now the only user role available to users. Users have been deactivated by default. You must reactivate users as a clinician.	Set Up ConnectEHR for FHIR
