

Prescribing Compound Medications (Web)

Last modified on 10/02/2024 4:40 pm EDT

The New Drug Database is Now Available in DrChrono!

In partnership with First Databank MedKnowledge (new drug database), DrChrono now supports the ability to electronically send compound medications that contain a controlled substance.

How to e-prescribe a compound medication

All compound medication/s must be prescribed via the Compound (type) option.

1. From the patient chart, navigate to Send eRx.
2. Choose Compound as the "type"
3. Once selected the Compound Parts dropdown will appear

The screenshot shows the 'New Prescription' form in DrChrono. The form is titled 'New Prescription' and is for 'Dr. Mark Williams'. The 'Type*' dropdown is set to 'Compound'. The 'Medication*' field is empty. The 'Compound Parts' dropdown is highlighted with a red box, showing a plus sign to add and a minus sign to remove parts. Below this, there are fields for 'SIG*', 'Effective Date', 'Dispense*', 'Dispense Unit*', 'DAW' (Yes/No), 'Days Supply', and 'Refills'. There is also a 'Diagnosis Codes' field and checkboxes for 'Add to Favorites' and 'Add to Medication List'. A note at the bottom states: '* Please do not enter SiG, Effective Date, Drug Name, Strength, Quantity or Dispense Unit in this field.'

4. When building a compound medication, the user will want to select the individual ingredients/medications first. This allows DrChrono to determine the DEA schedule for each ingredient. Each medication/ingredient will be a "Compound part". As compound parts are selected, the medication name will update to add the compound part.

Height: No Records Weight: No Records

New Prescription Patient's Prescriptions +

Compound Favorite medications x

Type* Medication **Compound** Supply

Medication* ▲ Controlled Substance Level 3
ketamine (bulk) 100% powder + amitriptyline (bulk) powder + lidocaine 4%

Compound Parts

- ketamine (bulk) 100% powder +
- amitriptyline (bulk) powder -
- lidocaine 4% topical cream -

SIG* Effective Date N/A: U

Dispense* Dispense Unit* DAW Days Supply Refills

30 / 1000

Diagnosis Codes

Notes to Pharmacist

* Please do not enter SIG, Effective Date, Drug Name, Strength, Quantity or Dispense Unit in this field.

5. Use the "+" and/or "-" buttons to add/remove the Compound Part(s)

Note:

- If the compound part is a controlled substance the system will indicate the level.
- If the compound medication/ingredient does not have any schedule II-V compound parts in it, the user will have to select the "There is no controlled substance within the compound prescription" checkbox in order to send the prescription.

Example of compound part (controlled substance)

New Prescription Patient's Prescriptions +

Compound ketamine 0.5% + amitript x

Type* Medication **Compound** Supply

Medication* ▲ Controlled Substance Level 3
ketamine 0.5% + amitriptyline 1% + lidocaine 4% topical cream

Compound Parts

- ketamine 50 mg/mL injection solution +
- amitriptyline 50 mg tablet -
- lidocaine 4% topical cream -

SIG* Effective Date N/A: U

Apply topically every 6 hours for pain

30 / 1000

Dispense* Dispense Unit* DAW Days Supply Refills

30 Milliliter Yes **No**

Diagnosis Codes

Notes to Pharmacist

* Please do not enter SIG, Effective Date, Drug Name, Strength, Quantity or Dispense Unit in this field.

Example of compound part (no controlled substance)

New Prescription Patient's Prescriptions +

Compound Magic Mouthwash, diphe

Type* Medication **Compound** Supply

Medication* Magic Mouthwash, diphenhydramine HCl 12.5mg/5mL + viscous lidocaine 2%, Maalox 1 part

Compound Parts +

- diphenhydramine 12.5 mg/5 mL oral liquid -
- Lidocaine Viscous 2 % mucosal solution -

SIG* Swish and spit 15 mL orally for 1 minute every 12 hours Effective Date N/A: U

55 / 1000

Dispense* 900 Dispense Unit* Milliliter DAW Yes **No** Days Supply Refills 1

Re-sending Compound Prescriptions

- Like non-controlled and controlled medications, users can resend compound orders via the Patient's Active Medication List.
 - Click on the Medication List chart tab.
 - Under the Active Medication Orders, select the appropriate compound prescription/s.
 - Press the Re-send Selected Medication button.

The newly generated medication order will appear in the Active Medication Orders list. The original compound medication order will then show in the Past Medication Orders list with a status of "inactive" and an "end date" of when it was resent.
