

Release Notes for DrChrono Mobile Version 11.0.107

09/03/2024 5:46 pm EDT

Updates

Summary	Description	Knowledge Base Article
Search by NCPDP on the mobile app	Users can search for a pharmacy on the mobile version of the DrChrono platform using the pharmacy's NCPDP.	
Resending compound prescriptions	A fix has been implemented to display/load compound parts when resending a compound prescription. All compound prescriptions created after the July 24th release will load the compound parts as part of a medication re-send workflow.	
Reduction in timeout issues for clinical notes with persistent forms (iOS)	We have reduced the number of timeout issues related to editing, previewing, locking, and unlocking clinical notes with persistent forms on the DrChrono iOS platform.
