

Checking In for an Appointment with OnPatient

Last modified on 10/23/2025 5:34 pm EDT

Patients can use OnPatient to check in before their appointments. During the check-in process, patients can enter/update their information, answer questions, and sign [here](#) for more information.

You can customize the [check-in interface](#) to hide sections or make fields required. You can also add fields with custom demographics in the **More Information** section. You can also customize the **Reasons for Visit** and **Additional Information** sections.

After logging in, click the **Check-In** button next to the appointment. Patients can only complete the check-in process before the scheduled appointment time. Once the scheduled appointment time has passed, the appointment will be moved to the past appointments section.

The patient will be taken to the onboarding forms for their appointment. Here they can enter their information.
