

# Release Notes for DrChrono Web 2024-10-10

Last modified on 10/16/2024 9:50 am EDT

## What's new

### Clinical and Regulatory

| Summary                                     | Description   | Knowledge Base Article     |
|---|---|----------------------------|
| Electronic Clinical Quality Measures (2024) | Electronic Clinical Quality Measure updates for the 2024 MIPS reporting period are now available. | <a href="#">eCQMS 2024</a> |

### Payments and RCM

| Summary   | Description  | Knowledge Base Article  |
|---|--|---|
| Updating details when reinitiating an enrollment with ePS | We have added the ability for a user to update details while reinitiating an ePS enrollment request. | <a href="#">eProvider Solutions- How do I resume a previously started enrollment request?</a> |

### Resolutions

| Product Area            | Summary  | Description  | Knowledge Base Article  |
|-------------------------|--|--|---|
| Payments and RCM        | EDI Dashboard Showing "Unknown" Status   | We fixed an issue where the EDI Dashboard displayed "unknown" under the status column. The column will display the current status of the enrollment.                         | <a href="#">eProvider Solutions- What do the different statuses mean?</a> |
| Clinical and Regulatory | Collection date and time still showing on order requisitions after creating Labcorp PSC orders | A fix has been implemented where the Labcorp requisition will no longer show the collection date and time if the Patient Service Center/Central Order Repository is enabled. |   |

| Product Area        | Summary  | Description   | Knowledge Base Article |
|---------------------|--|---|------------------------|
| Practice Management | Office sorting improvements when sort offices by name setting is turned on | We fixed an issue where when the sort offices by name setting was turned on for the practice, the order of offices in Calendar, the office dropdown when scheduling appointments, and the office dropdown under Calendar Settings in Account Settings did not match the order present under Active Offices in Manage Offices. If the sort offices by name setting is turned on, the offices now sort to match across the application. |                        |

## Coming soon

### Chart optimization enhancements

DrChrono is thrilled to announce upcoming features designed to streamline your workflow and enhance patient care!

#### Patient Header Redesign

The patient header is now fixed and auto-collapses for easier access to key patient information while scrolling. New features include displaying gender identity, a copy-to-clipboard function for patient names, and the ability to launch the Onpatient access screen directly from the patient header.

#### Customizable Patient Chart Header

The header can now be customized, allowing users to see the most relevant patient data based on their specialty or role.

#### Patient Chart Summary

The new patient summary offers a quick, read-only view of essential patient information, with links to relevant chart sections. Future updates will include additional widgets as well as making the summary view interactive and customizable, streamlining patient care.

#### Patient Chart Sidebar Navigation Customization

Users can customize the patient chart by showing, hiding, or reordering tabs based on their specialty or role.
