

# Code Analysis Report: Overview

Last modified on 04/09/2025 1:21 pm EDT

The Code Analysis Report is designed to give you easy insight into the top CPT/HCPCS/Custom Codes billed by your organization. The information can be viewed as the practice as a whole, a specific office location, an individual provider, or an insurance payer. This will allow you to compare reimbursements from a particular payer to your contract to ensure you receive your contractually agreed payment. The report will default to the top 5 codes, but it can be updated to any number.

The report is broken down into three tabs:

1. Payer
2. Code
3. Details

### Code Analysis
