The middle of the screen will show the information that meets the parameters set in graph form.

The graph on the left will show the number of claims, per month, with their billed dollar amount along with the total days to receive payment.

The graph on the right will show per month, the charge lag (amount of time it takes to code or add charges to the patient's account), the send lag (amount of time it takes to submit to the payer after charges are added), and the payment lag (the amount of time it takes to be paid after submitted).

The bottom of the screen will show the information that meets the parameters in table form. This allows for easy comparison across months.
