

Viewing billed claim details

Last modified on 01/22/2025 2:34 pm EST

When billing claims to a payer, sometimes it is helpful to see what information was on the claim when it was billed. DrChrono has added a place in the billing log to show you exactly what was on the claim. Each time you send out a claim, the details will be captured and stored in the billing log.

1. Simply press the **View 837P** and **View HCFA/UB04** to see the details transmitted.
