Utilization Analysis Report: Overview

Last modified on 11/10/2026 11:22 am EST

The **Utilization Analysis** report provides insight into scheduled and billable appointments, as well as appointments that were rescheduled, canceled, or marked as no-shows. The report can be filtered by date range, provider (single, multiple, or all), and office (single, multiple, or all) to help practices analyze scheduling trends and operational performance.

Once the parameters are set, the info will be displayed in both a bar graph and a chart.
