Glossary: Data Elements (EHI Export) v2

Last modified on 02/19/2025 7:38 pm EST

**Relevant to exports completed AFTER 2/19/2025**

Data Elements

Our EHI export data categories, file export names, fields and descriptions are as follows in Doctor Exporter, PracticeGroupExporter, Patient Exporter, and Media exporter.

Data exports are provided by export name and provided in .CSV data structure, each representing a record for distinct patient notated with the referenced patient_id. This structure is the same whether exporting a single patient or all patients. Data exports and fields are defined to make understanding the data easier, however, you can utilize the following Glossary for further explanation of the data is necessary:

Doctor Exporter

This folder is exported in both single patient and practice EHI Export files. For the single patient EHI Export, only the doctors file is included. All files listed below are included in the practice EHI Export.

- `CustomVitalType` : Custom vital types defined by doctors.

- `Doctors` : Basic doctor information.

- `EducationResource` : Educational resources data.

- `MUSyndromicSurveillanceLog` : Log details for syndromic surveillance.

- `Offices` : Office information associated with doctors.

- `PatientImportCCDAFile` : Information about CCDA files imported by doctors.

- `SoapNoteCustomReport` : Custom reports for SOAP notes.

- `SoapNoteLineItemFieldType` : Field types for line items in SOAP notes.

Media

This folder is only included in both the single and practice EHI Export.

- `clinical` : Clinical documents and uploaded patient documents.

- `dr_message_attachment` Patient doctor message files.

- `hipaa_forms` Practice consent form templates information.

- `education` : Custom patient education resources files for the practice.

- `message_attachment` : Patient DIRECT secure message attachment files.

- `patient_import` : Imported patient CCDA XML files.

- `inbound_faxes` : Patient inbound referral files.

- `LabOrderDocumentFiles` : Patient lab order document PDF files.

- `referrals` : Patient outbound referral files.

Practice Group Exporter

This folder is only included in the practice EHI Export.

- `LabQuestCDCOrderCode` , `LabQuestCDCOrderCodeAOE` : Lab order codes.

- `PracticeGroup` : Information about practice groups.

Patient Exporter

The patient folder is included in both the single patient and practice EHI Exports.

- `AdditionalResponsibleParty` , `ResponsiblePartyAddress` : Addresses and additional contact information for responsible parties.

- `Allergies` , `AllergySnomedCodeMapping` : Patient allergy information.

- `Appointments` : Patient appointment details.

- `AutoAccidentInsurance` , `PrimaryHospitalInsurance` , `WorkerCompInsurance` : Auto Accident, Primary Hospital and Workman's Comp. patient insurance information.

- `CarePlan` , `CarePlanAuthor` : Care plans and their authors.

- `CareTeamMember` : Members of the care team.
