Patient Chart Permissions

Last modified on 05/30/2025 1:48 pm EDT

Turn on the Patient Header permissions Turn on the patient chart sidebar permissions

When adjusting permissions and settings, the system follows a hierarchical order.

- The system initially looks for any user-level settings to show
- If there's no user setting, the system looks for any role-level settings
- If there's no role-level setting, the system looks for any practice-level setting
- If there's no practice-level setting, the system shows the DrChrono default settings

If any users in your practice are assigned to a custom role, it may impact your ability to use the **Patient Header** and patient chart sidebar.

- When permissions are adjusted at the user level, the user's role automatically switches to custom when you save the **Permissions Administration** page (Account > Staff Permissions > Providers or Staff tab).
- To revert a staff member's role from custom to public, select an option from the **Role** dropdown and then select **Save Permissions**.
- The best practice is to create a new role on the **Roles** tab on the **Permissions Administration** page to customize permissions and assign staff members (as a group) to a specific role to prevent possible workflow disruptions.

Your browser does not support HTML5 video.

Turn on the Patient Header permissions

Turn on the permissions to the **Patient Header** at the administrative or user level on the **Permissions Administration** page.

- 1. Select Account > Staff Permissions > Providers or Staff tab.
- 2. Select View.

The permissions window opens

- 3. Select Edit Permissions.
- 4. Do one or both of the following:
 - Select the **Practice Patient Chart Header Settings** checkbox to customize the patient chart header settings for the practice at the administrative level.
 - Select the User Patient Chart Header Settings checkbox to customize the patient chart header settings at the user level.
- 5. Select Save Permissions.

Turn on the patient chart sidebar permissions

You can turn on the permissions to the patient chart sidebar at the administrative or user level on the **Permissions Administration** page.

- 1. Select Account > Staff Permissions > Providers or Staff tab.
- 2. Select View.

The permissions window opens

- 3. Select Edit Permissions.
- 4. Do one or both of the following:
 - Select the **Practice Patient Chart Sidebar Nav Settings** checkbox to customize the patient chart sidebar settings for the practice at the administrative level.
 - Select the User Patient Chart Sidebar Nav Settings checkbox to customize the patient chart sidebar settings at the user level.
- 5. Select Save Permissions.
