Create an API Application

Last modified on 10/09/2026 3:24 pm EDT

You can use DrChrono Restful APIs to connect your practice to other services and leverage your data.

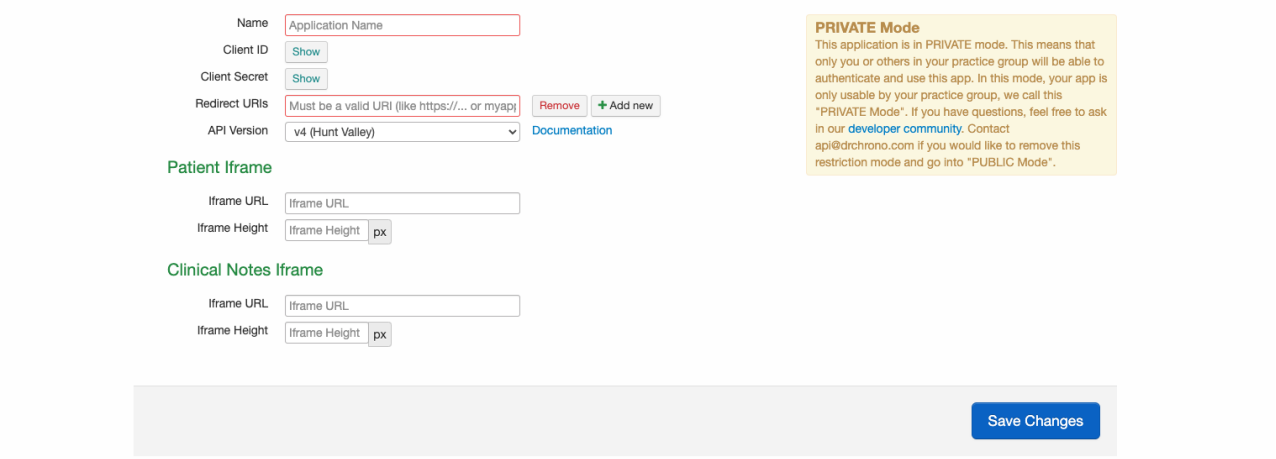

Requirement

You need the **Settings** permission turned on to access the API page.

Create an API application

1. Select **Account** > **API**.
2. Create a new application by selecting **New Application**.
3. Complete the fields. The **Name** and **Redirect URIs** fields are required.

   Make sure that your application is named for its intended service. Input a valid URI, for example, https://myapp.com.
4. Select **Save Changes**.

You are now ready to use our APIs. To get started, refer to Getting Started with DrChrono APIs via Postman.
