

# 2025 Eligible Clinician eCQMs: Changes Summary

Last modified on 12/17/2025 3:58 pm EST

Electronic Clinical Quality Measures (eCQMs) are tools that help healthcare providers track and report on the quality of care they deliver to patients. Each year, the Centers for Medicare & Medicaid Services (CMS) updates these measures to reflect the latest evidence-based practices and healthcare standards.

For the 2025 performance period, there are **47 eligible clinician eCQMs** available for quality reporting. The majority of these measures have been updated from their 2024 versions with improvements to measure logic, specifications, or value sets.

## What This Means for Your Practice

**Version updates** indicate that the measure specifications have changed. These changes may include:

- Updated clinical criteria or guidelines
- New or revised value sets (lists of diagnosis or procedure codes)
- Changes to how the measure is calculated
- Updates to the patient population included in the measure

When a measure receives a version update, you should [review](#) the specific changes to understand how they may impact your reporting and quality improvement activities. Even minor updates can affect which patients qualify for the measure or how performance is calculated.

## 2025 Update Summary

- **Total eCQMs Available:** 12 measures
- **Measures with Updates:** 11 measures received version updates
- **Measures Unchanged:** 1 measures remain the same as 2024

Version updates indicate changes in measure logic, specifications, value sets, or other technical updates. Practices should review the specific change documentation for each updated measure to understand the impact on reporting and quality improvement activities.

## 2025 Eligible Clinician eCQMs: Changes Summary Measures with Version Updates (Changes in Measure Logic)

### CMS50v13 - Closing the Referral Loop: Receipt of Specialist Report

**2024 Version:** CMS50v12

**Change:** Version updated from v12 to v13

### CMS130v13 - Colorectal Cancer Screening

**2024 Version:** CMS130v12

**Change:** Version updated from v12 to v13

## **CMS165v13 - Controlling High Blood Pressure**

2024 Version: CMS165v12

Change: Version updated from v12 to v13

## **CMS131v13 - Diabetes: Eye Exam**

2024 Version: CMS131v12

Change: Version updated from v12 to v13

## **CMS122v13 - Diabetes: Hemoglobin A1c (HbA1c) Poor Control (> 9%)**

2024 Version: CMS122v12

Change: Version updated from v12 to v13

## **CMS68v14 - Documentation of Current Medications in the Medical Record**

2024 Version: CMS68v13

Change: Version updated from v13 to v14

## **CMS90v14 - Functional Status Assessments for Heart Failure**

2024 Version: CMS90v13

Change: Version updated from v13 to v14

## **CMS69v13 - Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow-Up Plan**

2024 Version: CMS69v12

Change: Version updated from v12 to v13

## **CMS2v14 - Preventive Care and Screening: Screening for Depression and Follow-Up Plan**

2024 Version: CMS2v13

Change: Version updated from v13 to v14

## **CMS138v13 - Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention**

2024 Version: CMS138v12

Change: Version updated from v12 to v13

## **CMS156v13 - Use of High-Risk Medications in Older Adults**

2024 Version: CMS156v12

Change: Version updated from v12 to v13

---

## **Measures with No Changes (Same Version)**

# **CMS137v13 - Initiation and Engagement of Substance Use Disorder Treatment**

**2024 Version:** CMS137v12

**Status:** Version updated from v12 to v13
