

(ONC Update) Smoking Status

Last modified on 02/03/2026 1:02 pm EST

The Smoking Status form element allows providers to document smoking status in a structured format that maintains SNOMED codification.

How to Add Smoking Status in Clinical Form Management

1. Select the **Smoking Status** Form Element
2. Users add the Smoking observation form to the Clinical note to enter results

Smoking Status Options

A single-select dropdown is shown with the following options (the system stores the description and code):

| Description | SNOMED Code |
|-------------------------------------|-----------------|
| Smokes tobacco daily | 449868002 |
| Occasional tobacco smoker | 428041000124106 |
| Ex-smoker | 8517006 |
| Never smoked tobacco | 266919005 |
| Smoker | 77176002 |
| Tobacco smoking consumption unknown | 266927001 |
| Heavy tobacco smoker | 230063004 |
| Light tobacco smoker | 230060001 |

Document Smoking Status

Users can:

- Select a smoking status from the dropdown
- Enter Start and End Date

Auto-Populate Code Attachment

Upon selection:

- The SNOMED code is automatically populated in the Code attachment section (not editable)
- Users can add other associated codes manually
- SNOMED codes are automatically populated upon selection and cannot be edited

The Customized Note section keeps its current functionality, allowing the user to edit.

CCDA Output

The data is displayed correctly in the CCDA PDF generator using the appropriate SNOMED codes.

Backfill

Once smoking status is added to the form, the system will backfill the smoking status field in **Demographics > Smoking status section**.
