The screenshot shows the DrChrono EHR interface. On the left, there's a sidebar with navigation links: Schedule, Clinical, Patients, Reports, Billing, Account, Marketplace, and Help. The main content area has tabs for H&P, SOAP, ADDITIONAL, and APPS. The ADDITIONAL tab is selected, showing a 'Preview Note' for a patient named Chrissy Bright. The patient's photo, gender (Female), and date of birth (09/10/1971) are displayed. Below this is a 'Chief Complaint' section and a note about primary and secondary insurers. A 'Note Saved' message is shown. The right side of the screen displays a transcript of a conversation with Chrissy Bright. The transcript includes messages like "And now you would have your visit with the patient with the EverHealth scribe ambiently running in the background.", "So, Chrissy Bright, how is your pain?", "Oh, doctor.", and "I am really in pain, and my right pinky toe hurts.". There are also messages from the doctor like "Oh, let's see what's going on.", "I see that you have some bruising on your right toe.", "What would you rate this pain?", "Oh, doctor.", "I would rate it 0 to 1 I would rate it as a 7.", "Okay, Chrissy.", "Well, we're gonna prescribe you 50 mg of ibuprofen, and I encourage you to ice it and keep your foot elevated.", "Okay, doctor.", "Thank you.", and "And from here, you can either pause or stop.".

## Viewing the Generated Note

Once generation is complete, you can toggle between two views:

- **Transcript:** A word-for-word record of the conversation
- **Note:** The AI-generated clinical documentation organized by section

## Working with the Transcript

- Click "Copy" to save the transcript to your clipboard for your records
- Click "Restart Visit" if you need to re-record (you'll receive a warning before proceeding)

## Editing the Clinical Note

Scribe generates your note by pulling information from both the patient's chart and the visit transcript. The accuracy varies based on available patient context.

Transcript

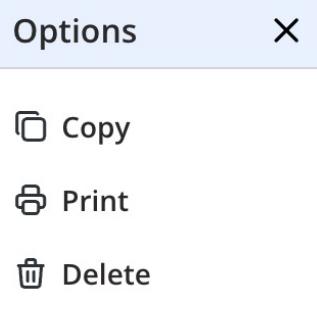

Note

#### HISTORY OF PRESENT ILLNESS

The patient is a **27-year-old** male with a **long history of significant medical history** including **hypertension** and **diabetes**. He is currently being evaluated for **acute left knee pain** and **difficulty weight-bearing**. He has a history of **left knee pain** and **difficulty weight-bearing** when walking up and down **stairs**.

#### MEDICAL/FAMILY/SOCIAL HISTORY

## Inline Editing

You can edit any section directly within Scribe. Click into any text field to make changes. The system will learn your documentation preferences over time and adapt to your style.

## Using the Magic Bar

The magic bar allows you to give AI instructions for specific sections. For example, you can type "Expand the Physical Exam section" and the AI will add more detail to that area.

## Providing Feedback

Each section has a feedback option where you can give positive or negative feedback. The sparkle icon next to each section indicates whether Scribe should remember the format of that particular section for future visits.
