View Your Health Record

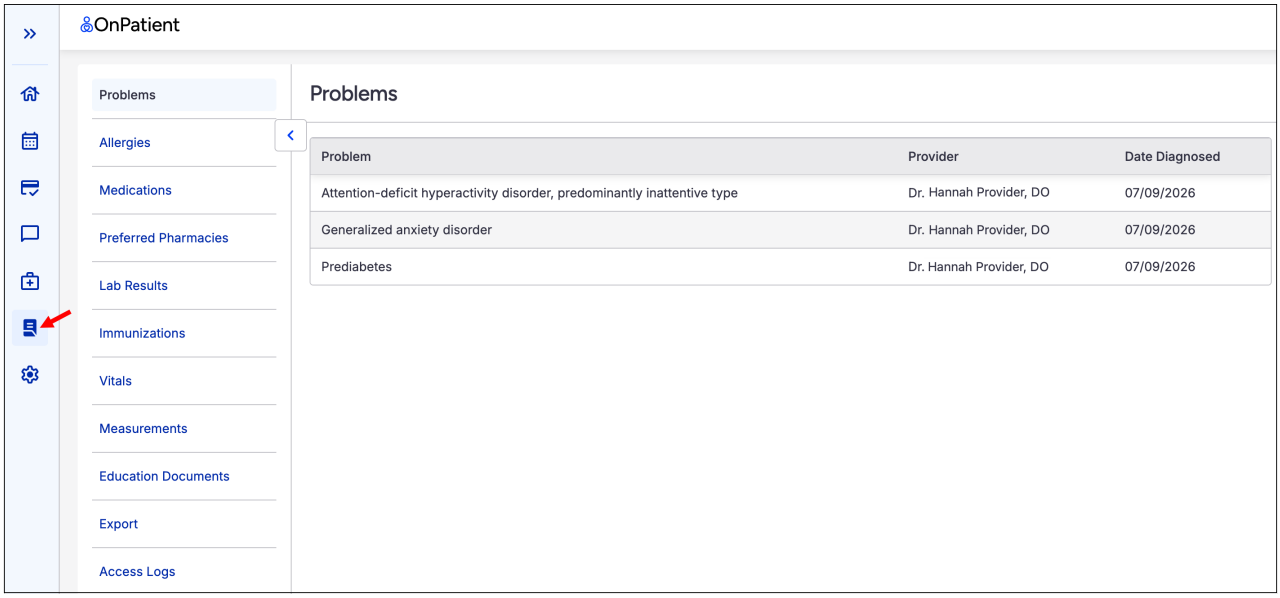

Last modified on 09/24/2026 4:46 pm EDT

> **About the new OnPatient portal experience**
> The redesigned OnPatient portal experience is currently in beta and available to select early-access users. This knowledge article may be updated as the portal experience evolves.

You can access your health information in the OnPatient portal after appointments are completed.

Access your health record

Select **Health Record**. The **Problems** section opens by default.

Health section overview

Section	Description
Problems	Diagnosed conditions on your chart, showing the problem name, the diagnosing provider, and the date of diagnosis.
Allergies	Recorded allergies (drug and non-drug), along with severity, the reaction experienced, and the provider who documented it.
Medications	Shows current prescriptions including the medication name, dosage instructions, the prescribing provider, and the date they were added to your chart.
Preferred Pharmacies	Add and manage pharmacies where you'd like your prescriptions sent.
Lab Results	Lab test results your provider has released.
Immunizations	Vaccines you've received, showing the immunization name, date given, the ordering provider, and who administered it. You can print a copy or save a PDF.
Vitals	Recorded vital signs such as temperature, pulse, blood pressure, respiratory rate, oxygen saturation, pain level, and smoking status, each with a timestamp. The most recent vitals show, but you can select one to view how it has trended over time.
Measurements	Physical measurements like height, weight, and BMI, along with pediatric-specific percentiles when applicable, each with a timestamp. The most recent measurements show, but you can select one to view how it has trended over time.

Section	Description
Education Documents	Any patient education materials your provider has shared with you.
Export	You can generate a patient health summary to share with another practice. You can preview a PDF version of the C-CDA file and email, download, or print the file.
Access Logs	Provides a log of any time your C-CDA has been accessed, including who accessed it, a timestamp, and what action was taken (view, download).
