Mobile App Release Notes - August 2026

Last modified on 09/22/2026 2:03 pm EDT

This month's mobile update focuses on stability and reliability, with iOS design compatibility for the Check-In app, a more dependable dictation experience, and an early look at EverHealth Scribe's new prescription draft recommendations.

Version: 2026.08.0 · **Platforms:** iPhone · iPad · Mac

In this release: ⚡ Platform & Reliability · Practice Operations · Clinical · Early Access

Affected practice roles: Front Desk · Practice Admins · Office Managers · Everyone · Providers · Clinical Staff · RNs & MAs · Front Desk · Practice Admins · Office Managers

⚡ Platform & Reliability

Check-In app updated for the latest iOS design

Available now

Front Desk · Practice Admins · Office Managers · iPhone · iPad

The Check-In app has been updated to stay fully compatible with the newest iOS design system, so your front desk keeps running smoothly on the latest Apple devices.

- No setup needed — the update applies automatically
- Fewer unexpected app crashes tied to iOS compatibility

More reliable dictation, fewer app crashes

Available now

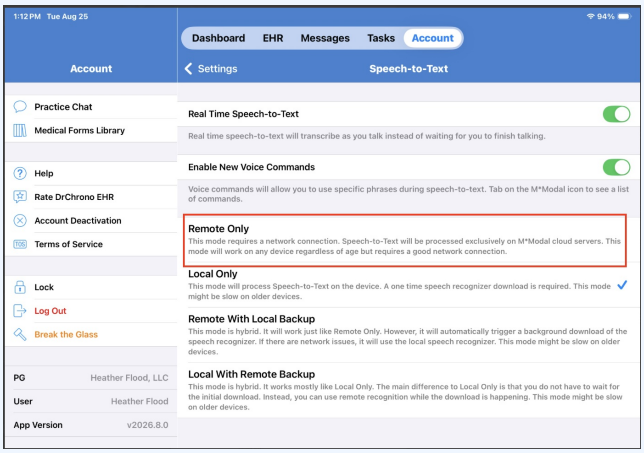

Everyone · Providers · Clinical Staff · RNs & MAs · iPhone · iPad · Mac

We've updated the dictation engine behind the mobile app to eliminate its most common crash and improve dictation accuracy and speed.

- Fewer unexpected crashes across the mobile app
- Clearer, more reliable dictation quality

Heads up

If you notice any slowness with Speech to Text, or it isn't appearing on screen as quickly as you're used to, go to **Account** > **Speech to Text Settings** and switch to **Remote** mode first to see if that improves things. After changing the mode, force close the app and relaunch it for the change to take effect.

Practice Operations

Select multiple tags at once when saving to a patient chart

Available now

Front Desk · Practice Admins · Office Managers | **Providers · Clinical Staff · RNs & MAs** | **iPhone · iPad**

The Tags field on the Save to Patient Chart screen is now a multi-select dropdown, matching the experience already on web — so you can apply more than one tag without repeating the save flow.

- Apply multiple tags in a single pass
- Matches the tag-selection experience on web

Send an OnPatient invitation right from Compose Message

Available now

Front Desk · Practice Admins · Office Managers | **iPhone · iPad**

Compose Message now includes the option to send a patient their OnPatient invitation directly, matching the workflow already available on web — no need to switch to a browser to get a patient enrolled.

- ✉ Invite patients to OnPatient without leaving the Message Center
- Matches the Compose Message workflow already on web

As part of this release, we are continuing our ongoing work to assess, monitor, and address any security vulnerabilities.

Early Access

Features available to select practices now. Contact us to join.

Clinical

EverHealth Scribe recommends prescription drafts from your visit

Early access · Full availability November 2026

Providers · Clinical Staff · RNs & MAs | EverHealth Scribe

EverHealth Scribe can now recommend medications and SIG entries based on your visit transcript, delivered as eRx drafts that flow through your existing delegation and approval workflow.

✍ Fewer manual searches through the medication compendium

Drafts flow into your existing eRx and delegation workflow — nothing new to learn
