Resolutions - August 2026 (Mobile)

This page is a complete list of bug fixes shipped in the August 2026 mobile release, organized by product area. For new features and enhancements, see the [August 2026 Mobile App Release Notes](#).

Practice Operations

- **Appointment list:** The appointment count shown in each schedule section now includes only in-person and video visit appointments, no longer counting break blocks in the total.

Clinical

- **eRx on iPhone:** Fixed an issue where the Favorites option was missing from the Add Medication menu on iPhone, even though it remained available on iPad and web.

This changelog reflects bug fixes only. For new features and enhancements, see the [August 2026 Release Notes](#).
