

Enhanced Billing Reports

Last modified on 10/07/2026 12:09 pm EDT

Enhanced billing reports

DrChrono now offers enhanced versions of the **Financial Transaction**, **Aging A/R Analysis**, and **Product / Procedure** reports. The enhanced reports include improved filtering, drill-down, scheduling, and export capabilities and are available alongside the existing report versions.

What's included

Save filters and views

You can apply filters to a report and save your filter selections as a named view for quicker access later. Saved views let you return to a commonly used filter configuration without reconfiguring your filters each time.

Schedule reports

You can schedule a report to run automatically at a set time. The report output is delivered to you as an email attachment.

Explore underlying data

The enhanced reports let you drill into the records behind your report results. Select **Show Underlying Data** to:

- Review the records that make up the report output.
- Apply additional filters to narrow results.
- Add columns that are not shown in the default report view.
- Export the data for further analysis.

Phase 1 reports

The following reports are part of the initial rollout:

- **Financial Transaction**
- **Aging A/R Analysis**
- **Product / Procedure**

The existing QuickSight versions of the Phase 1 reports will be removed on **October 15, 2026**. Start

using the enhanced versions now to familiarize yourself with the new functionality before the existing versions are retired.

Phase 2 reports

Enhanced versions of the following reports will be available from Oct 15, 2026

Billing

- Underpaid Items
- Billing Summary
- PLB Reporting

Reports

- Patient Insurance Authorization

Billing Intelligence

- Denial Analysis
- Insurance Payer Mix Report
- Insurance Submission Report
- Payment Waterfall Report
- Rejection Analysis
- Collection Analysis
- Charge Lag Report
- Reimbursement Analysis
- Charge Analysis
- Code Analysis
- Appointment Analysis

Practice Intelligence

- Utilization Analysis
- Patient Analysis

The existing versions of Phase 2 reports will be removed on **October 30, 2026**.

Rollout timeline

Date	Milestone
Now	Enhanced Phase 1 reports available alongside existing versions
October 15, 2026	Existing QuickSight versions of Phase 1 reports removed
After October 15	Phased rollout of enhanced Phase 2 reports begins
October 22, 2026	Enhanced Phase 2 reports targeted to be available to all customers
October 30, 2026	Existing versions of Phase 2 reports removed

Get help
