Mobile App Release Notes - October 2026

Last modified on 11/16/2026 12:01 pm EST

This month's mobile update brings the updated Message Center with threaded patient conversations to the EHR app, along with custom appointment fields, the iOS 26 Liquid Glass look, and California workers' compensation forms on iPhone. Early access adds the Stripe S710 terminal, an updated fax inbox, and Scribe rich text.

Version: 2026.09.0 · **Platforms:** iPhone · iPad · Mac. **Release date:** October 29, 2026

In this release: ⚡ Platform & Reliability · Billing & Revenue Cycle · Practice Operations · Clinical · Early Access

Affected practice roles: Front Desk · Practice Admins · Office Managers · Providers · Clinical Staff · RNs & MAs · Billing Staff · Prior Auth Coordinators

⚡ Platform & Reliability

The EHR app gets the iOS 26 Liquid Glass look

Available now

Everyone · iPhone · iPad

The DrChrono EHR app is updated for Apple's iOS 26 Liquid Glass design, following the Check-In app update in August, so the app keeps working and looking right on the latest iOS.

- Navigation bars, tab bars, and lists updated for iOS 26

No action required

Update to the latest version of the EHR app to get the new design.

Practice Operations

Keep every patient conversation together in the updated Message Center

Available now

Front Desk · Practice Admins · Office Managers · Providers · Clinical Staff · RNs & MAs

The updated Message Center in the EHR app groups patient messages into conversations and moves to a

new, modernized navigation, so you can follow a whole conversation in one place instead of searching for earlier context.

- Earlier messages on the same topic appear together in one thread
- A new layout that upcoming Message Center sections, like fax and tasks, build on

Heads up

The updated Message Center is rolling out to practices in phases starting October 26, with full availability by the end of November.

Fill in custom appointment fields from the EHR app

Available now

Front Desk · Practice Admins · Office Managers | Providers · Clinical Staff · RNs & MAs | iPhone · iPad · Mac

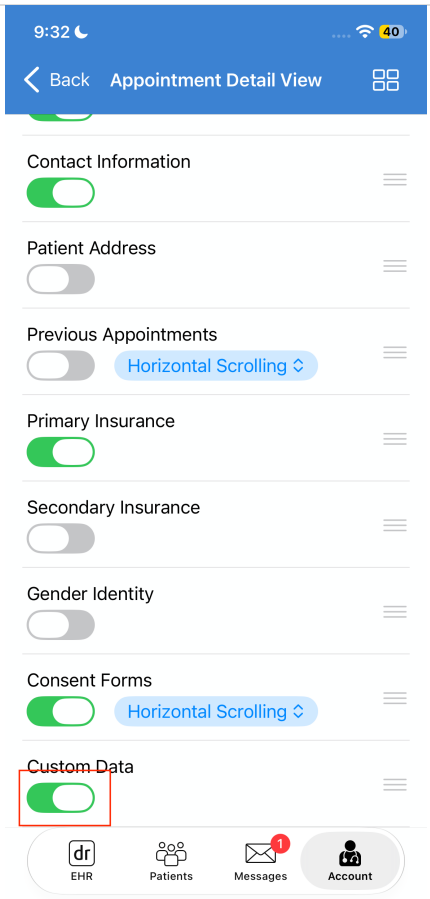

The Custom Data tab from the web now appears in the Appointment Details panel in the EHR app, so your team can capture custom fields during the visit instead of writing them down for the front desk to enter later.

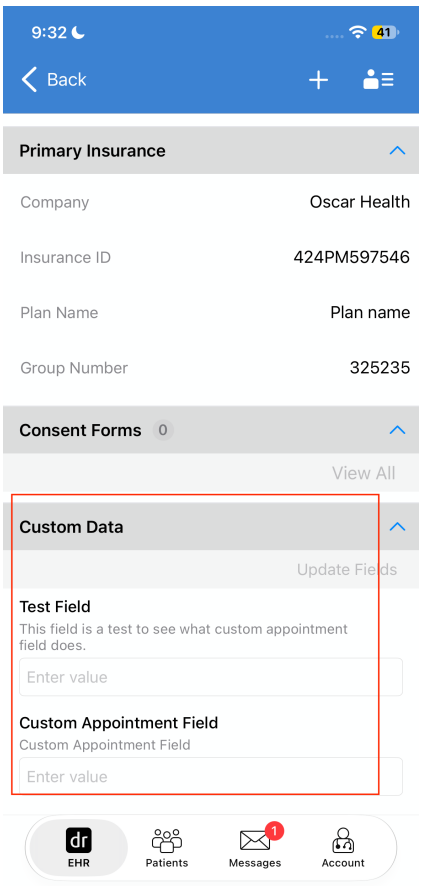

- Fill in your practice's custom appointment fields right from the app
- ⚙ Fields still come from your existing setup on the web

Setup required

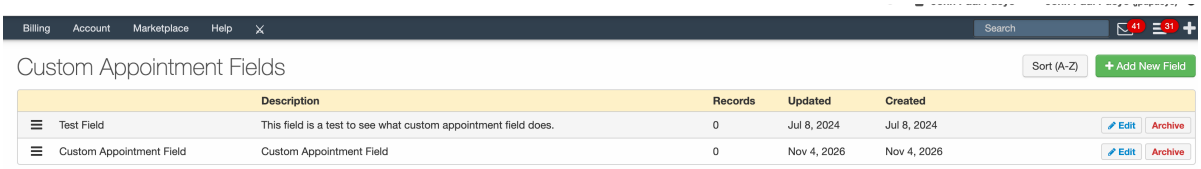

The Custom Data tab is off until you turn it on in **Account** > **Settings** > **Appointment Detail View Settings** on the EHR app. Fields are set up in **Account** > **Custom Fields** > **Appointment Fields** on the web.

Web view

Collapse and expand sections in Appointment Details

Available now

Front Desk · Practice Admins · Office Managers | Providers · Clinical Staff · RNs & MAs

Each section in Appointment Details now has its own header that you can collapse or expand, so you can get straight to the information you need with far less scrolling.

↕ Collapse any section and everything below moves up into view

Jump straight to **Add Payment**, payment history, and **View All** for patient flags, vitals, and consent forms

No action required

All sections are expanded by default, so nothing is hidden until you choose to collapse it.

Clinical

Complete California workers' compensation forms on iPhone

Available now

Providers · Clinical Staff · RNs & MAs | iPhone

The **CA Workers Comp Form** option is now in the clinical note **Tools** menu on iPhone, matching what's already on iPad, so you can fill it out from whichever device you have in hand.

Move through each tab of the form one screen at a time

Your entries save as you move between tabs

Heads up

This option appears for practices that have California workers' compensation forms turned on.

Also improved

The **Medications** module in the patient drop-down now looks and works like the one in the clinical note, including print, sign, and draw

Print and fax are now available on the OnPatient Check-In tab of a clinical note, just like on the web

As part of this release, we are continuing our ongoing work to assess, monitor, and address any security vulnerabilities.

Early Access

Features available to select practices now. Contact us to join.

Billing & Revenue Cycle

Take in-person card payments on the Stripe S710 terminal

Early access · Full availability November 2026

Billing Staff · Prior Auth Coordinators | Front Desk · Practice Admins · Office Managers

The Stripe S710 terminal connects directly to DrChrono Payments, so you can take chip, tap, and swipe payments from the EHR app and the Check-In app, with each payment recorded automatically.

- Chip, tap, and swipe on a Wi-Fi-enabled terminal
- No separate POS to reconcile against DrChrono

Setup required

Requires DrChrono Payments + Stripe and a Stripe S710 terminal.

S710 Card Reader Quick Start Setup Guide | S710 Card Reader Troubleshooting | S710 Card Reader: Collect a Payment | S710 Card Reader: Manage Your Devices | Stripe S710 Card Reader Overview

Practice Operations

Work the Incoming Fax inbox the same way on any device

Early access · Full availability December 2026

Front Desk · Practice Admins · Office Managers | Providers · Clinical Staff · RNs & MAs

The Incoming Fax inbox in the EHR app now matches the web, so staff can handle faxes the same way on iPad, iPhone, or a computer.

- Fax and patient message headers show more patient information
- Updated filters and clearer sender details
- Attach multiple items to a task, just like on the web

Clinical

Keep EverHealth Scribe's formatting in your clinical notes

Early access · Full availability January–March 2027

Providers · Clinical Staff · RNs & MAs | EverHealth Scribe

The yellow sticky note in the clinical note now supports rich text in the EHR app, so formatting from EverHealth Scribe comes through intact and you can edit it in place.

✍ Scribe formatting carries into DrChrono as is

Edit with formatting right in the note, so notes look the same in Scribe and DrChrono

Work with After Visit Summaries right in the EHR app

Early access · Full availability January 2027

Providers · Clinical Staff · RNs & MAs | EverHealth Scribe

The After Visit Summary now has a home in the clinical note on mobile, filled in from EverHealth Scribe or by hand if you don't use Scribe, with the same tools you use for your other templates.

Copy from another note, then preview, save, print, or fax the section

Send the section to the patient's OnPatient account, and retract it if you need to send an updated copy

Use the **Include in Note** toggle to control what goes into the final note
